

Test 1.5 - Error #450 FIXED

Root Cause

Error #450: Wrong number of arguments or invalid property assignment

The problem was accessing table cells using:

```
vba  
  
r.Range.Cells(1, tbl.ListColumns(...).Index).Value
```

This caused a conflict between row-relative and table-relative indexing.

Solution

Changed to direct table access:

```
vba  
  
' Get column indices once  
colDevFunc = tbl.ListColumns(AV_Constants.COL_AVCPM_DEV_FUNC_NAMES).Index  
  
' Access data directly via DataBodyRange  
devFunc = tbl.DataBodyRange(rowIndex, colDevFunc).Value
```

Benefits

- Clearer code
- No nested property access
- Direct table data access
- More efficient

Replace

- AV_Core_v2.1_COMPLETE.bas

Test 1.5

Run `Test1_3_DirectMapTest` again.

Should now see:

```
[Row 1] Processing...  
[Row 1] devFunc = Validate_Column_GIWQuantity  
[Row 1] Adding Validate_Column_GIWQuantity to dictionary  
[Row 1] SUCCESS - Total loaded: 1  
...  
[GetAutoValidationMap] Success: 9 | Skipped: 0  
Result count: 9
```
